[WHO WE ARE]

Non Standard Socket Screw are a major stockist & manufacturer of high quality fasteners. Setting standards since our establishment in 1971 we have the capacity to supply a unique range of products, from prototype to special to standard.

With a range that begins at M1.4 up to M64 (and imperial equivalents) and lengths as long as 700mm we aim to provide an unparalleled service.

Accreditation to BS ISO 9001 ensures quality products meeting worldwide standards are distributed to a customer base that extends across 5 continents.

[THE PROCESS]

[HOT FORGING]

45-120 ton capacity presses to hot forge diameters from 5mm to 36mm with lengths up to 700 mm(including imperial equivalents) in a varied range of head forms and recess shapes.

[CNC TURNING]

Our CNC range of horizontal, "sliding head" lathes and VMC supplemented with our CAD/CAM planning and simulation programme have the capacity to profile mill and turn diameters from 2mm to 64mm (5/64" to 2 1/2").

[GRINDING]

Close tolerance grinding capabilities (including h8 & f9 shoulder diameters) and accurate pre-thread rolling diameters are achieved on our centreless grinding machines.

[THREAD ROLLING]

Optimum strength thread profiles M3 to M36 (including imperial equivalents) are available from our thread rolling machines. Single point thread forming up to M64 and equivalent is also available.

[HEAT TREATMENT]

Our self-contained heat treatment department can process a range of alloy and stainless steel grades including 8.8, 10.9, 12.9, 14.9, L7 & B7 or to your individual requirements.

[MANUFACTURING]

Our manufacturing facility has been developed over 35 years to meet our customers exacting standards. It includes double blow hot forging presses, CNC turning and milling lathes plus grinding and thread rolling machines. Parts can be manufactured in a variety of steel alloys as well as brass, aluminium, titanium and a range of other exotic materials.

Heat-treatment is performed on-site guaranteeing total process control to the highest standard with full batch traceability.

[STANDARD PRODUCTS]

As a leading supplier of standard socket screws, we stock products from the worlds foremost accredited manufacturers including Unbrako and Holokrome.

This enables us to offer our customers quality of the highest level at the most competitive prices. Added to which our standard manufactured items enable us to supply an unrivalled range of high grade fasteners.

Same day/next day delivery.
